

# Florence Green

Community Greening Project, New Cross/ Deptford

Joint community group project

Tanners Hill Tenants Residents Association & Florence Road

Residents' Group

# The Project Site

# March 2023

We used recycled fabric to create screen-printed posters for the green. These helped deter dog fouling on site.

# April 2023

We created the layout and wording for an interpretation board detailing the aims of our project. The board was donated by Lewisham Homes.

# May 2023

We installed temporary netting around the site and attached posters designed by our children to persuade dog walkers to pick up their mess.

# May 2023

We discussed the grass mowing requirements with Lewisham Homes' maintenance team in preparation for our wildflower meadow seed planting.

We are creating paths for the community to walk through.

# June 2023

We held our first workshop to create our planters out of old pallets - workspace and tools were provided by local business House of Noise.

# June 2023

House of Noise kindly donated old Victorian floorboards which were used to make six bird boxes during our community workshop.

# August 2023

We obtained numerous tins of paint for our planters from the Veolia Paint Recycling Scheme on the Old Kent Road.

# September 2023

We worked with Lewisham Council to install these anti-dog fouling stencils on the pavements around the site.

# October 2023

Community days digging beds for our native hedge planting. Gardening tools borrowed from Lewisham Homes.

# October 2023

Children from both community groups attended a bird box painting workshop at Heston Nature Garden.
